SUMMARY

Aspiring Full Stack Developer and Machine Learning enthusiast currently working towards a B.Tech in Computer Science and Engineering with a specialization in Artificial Intelligence and Machine Learning. Have a sound knowledge base in computer science, software development, and problem-solving and have practical experience in building full stack applications as well as machine learning/deep learning models. Good at using AI and ML algorithms to make predictions and classifications, with an accuracy rate ranging from 86% to 90%.

EDUCATION

B.Tech - CSE with Artificial Intelligence & Machine Learning **08/2023 - Present**
SRM Institute of Science and Technology, Chennai, India | CGPA: 8.72

PROJECTS

Cancer Cell Classification from Chest CT Scans using Explainable AI

- Developed a machine learning model to classify chest CT scan images into malignant and benign cancer categories using Python and TensorFlow.
- Applied image preprocessing and CNN-based deep learning techniques, achieving 88% classification accuracy.

AI-Powered CCTV Surveillance with Intrusion Alarm

- Built an AI-powered surveillance system using computer vision to detect unauthorized access and trigger real-time alerts.
- Achieved 90% detection accuracy using the COCO dataset, applying machine learning and object detection techniques for motion and activity detection.

Bone Fracture Detection Using Deep Learning (MURA Dataset)

- Implemented a deep learning model to classify bone fractures from musculoskeletal radiographs using the MURA dataset.
- Achieved 86% classification accuracy through data preprocessing and a CNN-based architecture.

CERTIFICATIONS

- E-Hack Hackathon, SRM - Participation
- Code IT Tech Solutions Hackathon - Participation
- AWS Certified: Cloud Practitioner (2026)
- AWS Certified: Developer - Associate (2026)
- MATLAB: Deep Learning (2025)
- CISCO: Computer Networking Basics (2025)

INTERNSHIP

Information & Communication Technology Intern **12/2025 - 01/2026**
Stellantis (FCA Citroën) India Automobile Private Limited, Chennai, India

- Created a proof-of-concept for an email automation tool that utilized Python and automation technology in order to onboard new members and simplify communication process.
- Gained practical experience in IT processes, corporate communication systems, and process automation, which led to the achievement of 20% faster onboarding due to increased communication efficiency.

TECHNICAL SKILLS

- **Machine Learning & AI Frameworks:** TensorFlow, OpenCV, Machine Learning Algorithms, ML Model Training, Convolutional Neural Networks (CNN), Deep Learning(Intermediate).
- **Web Technologies:** HTML, CSS, MySQL(Advanced), JavaScript, React, AI Prompt Engineering (Intermediate).
- **Tools, Platforms & Languages:** Git, GitHub(Advanced), Google Colab, LLMs, C, C++, Python (Advanced).

SOFT SKILLS

- **Problem-Solving & Adaptability:** Problem-Solving, Self-Learning, Critical Thinking, Adaptability.
- **Communication & Teamwork:** Communication, Team Collaboration, Leadership, Time Management.
